H4 Inadequate Planning and Guidance

In exams such as the UPSC, where the level of competition is so high that binary numbers may alter your outcome, test preparation planning is critical. Another cause for failure in the UPSC IAS test is a lack of planning. Many students make a topic more difficult for themselves by making it their focal point, and as a result, they do not perform well in other subjects. A few students develop a strategy but don't keep to it, and as a result, they fail to pass this exam. Planning does not imply creating a schedule, but in the case of the IAS test, it should include devising a strategy for preparing certain topics within a specific time frame. So go ahead and make one, and stick to it.
